

TETŐKLÍMA COMPACT 4U HD4 12V/24V (62 700 172/62 700 173)

1. Product Photos

2. DRAWING DIMENSION:

L: 750mm W: 680mm H: 170mm

3、 TECHNICAL DATA:

Cooling capacity: 4000W / 13640BTU

Compressor: 5H14

Compressor weight: 5.6KG

Refrigerant: R134a

Evaporator air flow: 600 m³/h

Condenser air flow: 500 m³/h

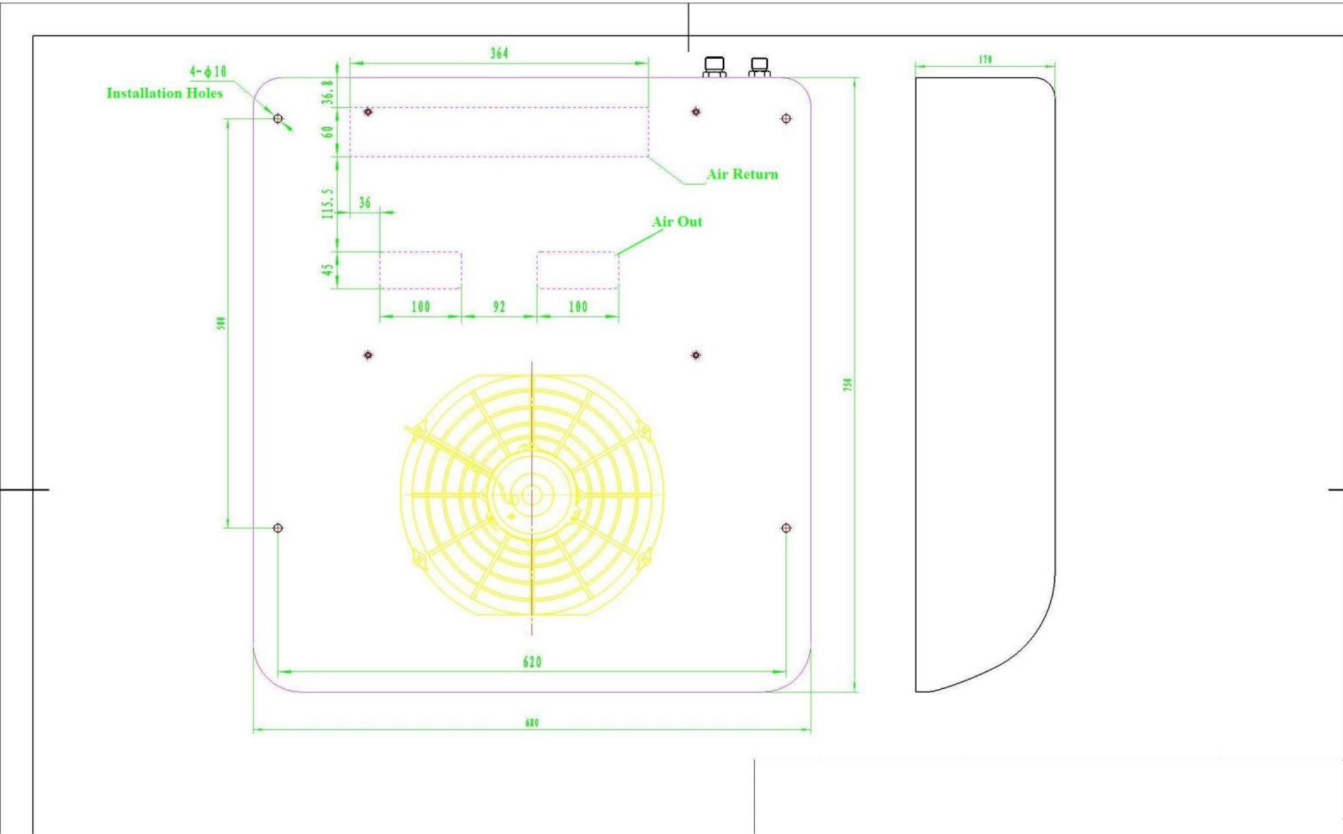

Total current: ≤11A (24V)

VEHICLES MODEL: Construction Machine; Truck Cabin; Agriculture Machine;

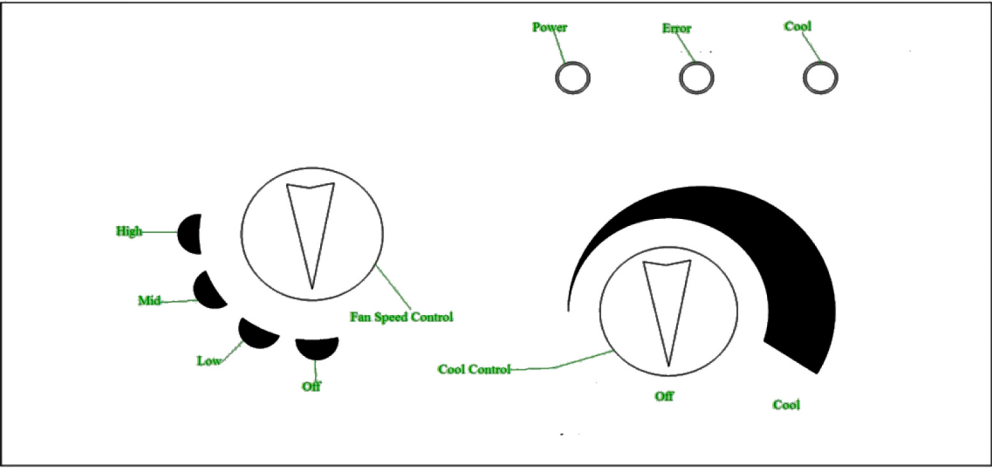

4、 PARTS LIST:

No.	PARTS	DESCRIPTION	FEATURE	QTY	UNIT	REMARKS
1	Compressor	5H14		1	Set	
2	Evaporator Assembly		Cooper tube and fin aluminum	1	Set	
3	Evaporator Blower		High efficiency, low noise, long life (6000hr)	1	Set	
4	Expansion Valve	Danfoss	High sensitive and immovability	1	Pc	
5	Sight Glass		legible, reliable, resist heat and vibration	1	Pc	
6	Condenser Assembly		Cooper tube and fin aluminum	1	Set	
7	Condenser Fan		High efficiency, low noise, long life (6000hr)	1	Pc	
8	Drier			1	Pc	
9	Pressure Valve		High/Low pressure switch	1	Set	
10	Electrical Wiring Harness	24V/12V	with silver the anti- acid and alkali salt corrosion and dustproof, waterproof connector	1	Set	
11	Relay			1	Set	
12	Controller			1	Set	
13	Rubber Hose	Good Year	No leaking, resist to aging and long life	1	Set	
14	Installing Accessories			1	Set	

5. INSTALLATION DIMENSION

6. INSTRUCTION OF CONTROL PANEL

A. Cool Control : Adjust the Temp of the Cab;

B. Fan Speed Control : Adjust the speed of the evaporator fan and air blow

C. Indicator Light: Cool (Green Color), Compressor Started, and begin to cool;

- Power (Yellow Color), the unit is powered, and the evaporator fan begins to work;
- Trouble (Red Color), there is error in the system, and stops working;

※Users Attention

When you use TKT-40T for the first time, please turn the Fan Speed Button and Cool Control Button to High, and last for 5 minutes after the compressor starts. And the temperature begins to fall. Please turn the Fan Speed Button and Cool Control Button when you get the appropriate temperature;

When you use TKT-40T, please do not turn the Cool Control Button to Biggest, and turn the Fan Speed Control Button to Low. It will makes the evaporator frosting, and reduce the cooling performance.
